

**Minnesota Association of Geriatrics Inspired Clinicians (MAGIC)
Alliance for Clinical Excellence (ACE)
Updates to Standing House Orders (SHO) 2024**

We are pleased to share the 2024 MAGIC ACE SHO. Updates from the 2023 orders are highlighted below in red.

We encourage medical directors to work with their facilities to institute this updated order set and add any additional facility-specific orders at the bottom. As always, nurses must review the patient's medication list and allergies before initiating standing house orders. All orders initiated from the standing orders should be communicated to the provider the next business day.

Changes:

➤ **Diabetic Management**

- Initiate qid blood glucose monitoring upon admission x 3 days for ALL diabetic patients unless ordered otherwise.
- **If DMII:** Notify provider if two BG results are < 70 or > 400 in a 24-hour timeframe and/or change in condition; if no condition change, notify provider on the next business day
- **If DMI notify the provider if any BG results are < 70 or > 400 and/or change in condition**
- Unless specified otherwise, no sliding scale insulin coverage at HS.

➤ **Constipation** (Perform steps sequentially)

1. Consider rectal check to determine if impaction is present.
2. Encourage 2,000 ml daily fluid intake unless contraindicated.
3. Consult nutrition services for dietary recommendations.
4. Sennoside **8.6 mg**, take 2 tablets PO at HS prn x 3 days.
5. Bisacodyl suppository 10 mg PR daily prn x 3 days.
6. Reattempt Senna or Bisacodyl if no results after 24 hours and notify provider.
7. Monitor and record results from treatment.

➤ Minor editing of topic headings and reordering of topics to help keep each topic on one page

We are thankful for all the clinical expertise that went into developing and maintaining this order set. We encourage the use and sharing of this document. We welcome feedback.

Best,

MAGIC-ACE SHO 2024 Committee
